

North Cedar Avenue Reconstruction

Owatonna
Minnesota

ISG

TRAFFIC PATTERNS

Traffic patterns for a construction project on N. Cedar Avenue will change starting Monday, August 16th, 2021. Weather permitting, the intersection of N. Cedar Avenue and Pearl Street will be closed. Traffic has been re-opened at the Rose Street intersection, however both directions of travel along N. Cedar Avenue from Rose Street to Pearl Street remain closed. Traffic will be routed around the work area via. CSAH 45/Oak Avenue, E. Main Street, and N. Elm Avenue. The Vine Street, and Broadway Street intersections will remain open to traffic at this time. Pedestrian access is to be maintained to all businesses along N. Cedar Avenue throughout the project.

CONSTRUCTION SCHEDULE

Construction on N. Cedar Avenue is anticipated to continue throughout the summer with traffic control changes occurring as work progresses. The roadway is planned to be re-paved before the end of the year while the alleys and landscaping is to be finalized next year. All dates are subject to change due to weather or other factors. The City of Owatonna advises motorists to drive with caution and slow down through work zones for their safety and for the safety of the construction crews.

Things to Keep in Mind:

During construction, access may be limited. To help ensure a timely construction process, please follow all construction updates and be sure to:

- Follow detour signage
- Keep out of construction areas
- Drive slowly through work areas and pay attention to traffic control changes throughout the project

Businesses will remain open and an accessible route will be provided to all the businesses. Please support local business during the construction process!

QUESTIONS?

If you have any mobility concerns that require special accessibility requirements to driveways or walkways during construction contact:
