An **EVENT** is a call for service, whether initiated by dispatch or officer that is kept within the CAD system. A **REPORT** is a written statement about an event that is filed within a Records Management System (not all events become reports, but all reports will have an event number as well as a report number). Using the LOGIS reporting tool, it is anticipated and planned that there may/may not be a + or - 3% margin of error.

This is my Shield

*"This is my Shield. I bear it before me in battle, but it is not mine alone.
It protects my brother/sister on my left, it protects my city.
I will never let them out of its shadow, nor my city out of its shelter..."*

Spartan Warrior Proverb

"Underneath everything that we are, underneath everything we do, we are all people, connected, interdependent, united. And when we reach out a hand to one, we influence the conditions of all. That is what it is to live united."
